

LKH-2000

A new software package for creating basic workstations for a wide range of X-ray inspection applications

- Applications in manufacturing, forensics, gemology, medical devices, etc.
- Produce sharp, noise-free X-ray images with text labeling.
- Make calibrated measurements of linear distances with pass/fail reporting.
- Archive inspection results in disk image files and video recordings.

Measure linear distances with pass/fail reporting.

System Requirements

Windows 10, 7, XP
RS-170 video input
USB frame grabber

Live Image Processing

Frame Averaging
Image Sharpening
Pseudo color
Automatic Contrast

Analysis Features

Linear Distance
Pass/Fail reporting
Split-Screen Display
3-D Rendering

Image Archiving

Save Image to Disk
Video Recording
Text Labeling
